Case Study

Aerial Training Services

Key to QinetiQ Group global Aerial Threat Representation Strategy

© Michael Bittner

QINETIQ

QinetiQ GmbH provides superior Aerial Training Services (ATS) to the German Armed Forces (Bundeswehr), as well as NATO and EU forces. ATS is a key part of the QinetiQ Group global Aerial Threat Representation Strategy, operating with a fleet of highly agile Pilatus PC-9 and PC-12 MMA aircraft. The services delivered to our customers include; Joint Terminal Attack Controller (JTAC) training, close air support, maritime air operations, ground control intercept training, air traffic control training and target towing.

The brief

German and NATO forces need to maximise their defence capability and be fully prepared for all imaginable military engagements that can occur around the globe. QinetiQ unfolds its full potential by offering military operational readiness training; the training is highly cost-effective compared to traditional in-house military training support and can be rolled-out quickly according to customer requirements.

Our solution

QinetiQ has been delivering a range of Aerial Targeting Services for more than 20 years. These services include target towing, close air support, maritime air operations, ground control intercept training and air traffic control training. As a trustworthy partner, QinetiQ is the leading provider of operational live aerial training services to the German Bundeswehr and NATO countries. QinetiQ has carried out more than 75,000 flight hours to support troops and considers itself a vital piece of the puzzle in protecting soldiers, through the delivery of this high-quality training.

Outcome and benefits

QinetiQ has a proven record of delivering reliable, tailored, cost-effective airborne training solutions to its customers. Equipped with a modern fleet of Pilatus aircraft, QinetiQ is a top-of-the-line partner for all German and NATO forces. In addition, as a certified Aircraft Design Organisation (EASA Part 21 J), the team provides the modification of PC-12s for special mission aircraft, to offer a portfolio that is tailored to the needs of the modern forces; this includes C2 - secured military communication – Electronic Warfare (EW) and Air-Land / Sea-Land Integration to cover digitization aspects and build a sustainable solution for next generation aerial training services.

QinetiQ is always on your side, protecting, improving and advancing your vital interests
