Integrating Test & Evaluation from Concept to Operation

Phase 1: Sub-systems evaluation

QinetiQ delivers T&E services to inform and validate the design and performance of the major sub-systems of a platform, initiating the digital thread of performance evidence.

Phase 2: Integration of sub-systems in to platform

As the sub-systems are integrated in to the platform, QinetiQ provides expertise, digital tools, facilities and ranges to assure the warfighting capability of the platform, exploiting the digital thread at platform level.

Phase 3: Wider capability integration

QinetiQ has expertise across all defence domains, with access to facilities and ranges that enable evidence to be generated to populate the platform's digital thread, underpinning its assurance for warfighting capability.
