

Who We Are & What We Do

QinetiQ US is a leading defense and national security company delivering mission-led innovation in advanced engineering, rapid prototyping, autonomy, ISR, maritime systems, force protection and survivability, and mission operations. We serve the U.S. Department of War, Homeland Security and other U.S. Government agencies, and allies with next-generation solutions that strengthen defense postures and support national priorities.

Our U.S. Footprint

 **900+**
Employees

 **92%**
Employees with Secret
or higher clearance

 **26%**
US Veteran Employees

Manufacturing facilities exceeding 60,000 sq. ft. in Massachusetts producing advanced robotics, complex maritime systems, survivability solutions, and aerial target platforms

Strategic presence in 10 key states and territories: Colorado, Florida, Maryland, Massachusetts, New Mexico, North Carolina, Puerto Rico, Rhode Island, Texas, and Virginia

America-First Supply Chain

 **55%**
Subcontracts awarded to
American small businesses

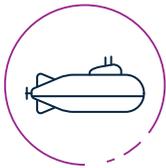

- U.S.-based supplier network for critical systems including aerial targets, aerostats, and autonomous robotics
- Accelerated defense acquisition capabilities as a non-traditional contractor with established global networks supporting foreign military sales

Alignment to U.S. National Defense Strategy

Strengthen Border Security by Offering Real-Time Surveillance for Anti-Terror and Homeland Security

- Deploying high-end sensor technology, persistent surveillance platforms, and autonomous systems that support border patrol operations and interdiction missions
- Operating multi-site strategic and tactical class aerostat sites for U.S. border security with industry-leading mission effectiveness

Maritime Expertise: Advancing Naval Strength and Shipbuilding Priorities

- Serving as a critical supplier to Electric Boat on the Virginia-class submarine program, delivering essential electromechanical components and solutions
- Providing control hardware and software for the Electromagnetic Aircraft Launch System and Advanced Arresting Gear on Ford-class aircraft carriers

Supporting the Counter UAS Mission

- Leveraging expertise in rapid design and development to support the Army's Family of Counter UAS Systems initiative with AI/ML integration
- Providing dynamic aerial target capabilities to support test and evaluation as UAS and drone threats evolve

Supporting Space and Missile Defense Priorities

- Delivering critical systems engineering and technical assistance to the Space Development Agency to improve missile tracking capabilities
- Expanding collaboration with the Strategic Capabilities Office to accelerate the transition of advanced capabilities to counter emerging threats

As the U.S. arm of QinetiQ Group plc (QQ.LSE), we operate under a Special Security Agreement (SSA) with the U.S. Government to ensure secure operations and protection of classified information.
