

# QinetiQ Target Systems

**7000** Banshee targets have been manufactured

## BBT-3 Banshee

Operated under contract, in over 30 countries including 13 within NATO.

Provide accurate and reliable flight profiles to ranges of over 100 km.

Flight to altitudes of over 7,000 metres can be achieved with Banshee.

## Banshee Jet 80

Fitted with twin 40 kg thrust gas turbine engines giving a total of 80 kg of static thrust.

Endurance with mixed throttle mission time in excess of 45 minutes.

Wingspan of 2.49 metres (8ft 2in).

## Banshee Jet 110

Maximum straight and level airspeed of more than 200 metres/second.

Operating temperatures of -20°C to +50°C.

Max altitude 8,000 metres, min altitude 5 metres.

## Mosquito UHV-T

Dry weight 190.5 kg (420 lbs).

Endurance 2 hours typical\* (auxiliary fuel tanks available to extend endurance to >4 hours).

Maximum speed 75 knots (139 km/h).

## Vindicator

Capable of replicating threats including high diver, UAV, low-slow-flyer and helicopter.

Speed range: 105-322 km/h.

## Snipe

Air defence practice on land and at sea and as a target operator training aircraft.

Wing span: 2.20m, Length: 1.76m.

## Hammerhead USV-T

Hull length 5 metres and 900kg.

Hit Quantity 432 soon, most used and exported USV in the world.

Designed to simulate a Fast Inshore Attack Craft (FIAC) in a multi-vehicle swarm of up to 40 vehicles.
