

# LAST Armor<sup>®</sup>

## Rotary Wing Protection

For over 20 years, QinetiQ has been the largest global provider of add-on aircraft armor. LAST Armor<sup>®</sup> (Light-appliqué Armor Systems Technology) is a protective, lightweight armor solution that provides high-performance ballistic protection for fixed wing transport and rotary wing platforms.

### **Durable. Combat-Proven.**

Utilizing high performance laminate materials and advanced ceramics, LAST Armor<sup>®</sup> solutions outperform traditional ballistic protection solutions. Formulas are tailored to defeat primary small arms threats and higher caliber munitions at stand-off distance. Its attachment system offers superior strength—five times stronger than commercial products. Since 1995, LAST Armor<sup>®</sup> has provided ultimate protection from small arms fire on C-130J, C-130E/H C-5, and C-17s as well as CHI-234, CHI-107, AH-1W platforms.

### **Adaptable**

LAST Armor<sup>®</sup> can be applied to fixed and rotary wing/vertical lift aircraft. Both modular and permanent solutions can be easily installed by the flight crew and without tools. The armor kits can be easily rotated between aircraft—enabling rapid application, removal and replacement of armor protection in the field.

### **Key Features and Benefits**

---

Configured designs based on platforms-specific requirements

---

Modular and permanent solutions

---

Lightweight

---

Complete lifecycle support from initial design, to production, to spares

---

Armor kits installed and removed quickly without modification or use of special tools—average install/removal less than two hours by two personnel

---

Field serviceable without the use of special tools

---

Scalable solutions as threats change

---

Highly durable

---

Provides critical protection to valuable military assets

---

Provides critical protection to the flight crew

---

Saves lives

---
