

Frag Bag

Bomb Mitigation Containment System

Frag Bag is a bomb containment enclosure designed to contain fragments and mitigate the blast pressure from a typical pipe bomb.

Key Features and Benefits

Provides safety from typical pipe bombs

Lightweight

Easily transported

Captures fragments for forensics

Safe to x-ray

Physical dimensions: 22" L x 13" W x 12" H

Weight: Less than 25 pounds

Since 1997, Frag Bag has been used in the US to provide safety to local and federal law enforcement, private security, postal security and corporate mail room personnel. It was famously used in response to the suspicious packages sent to Time Warner/CNN in the US in October 2018.

Flexible Design

Frag Bag is compatible with bomb disposal robots and is designed with a number of "grab points" that allow it to be opened, loaded, closed and transported with a bomb stick or remote manipulator. With its compact design, Frag Bag can easily fit into the trunk of a car and is light enough to be hand carried.

Collaborating with QinetiQ Inc.

At QinetiQ we bring organizations and people together to provide innovative solutions to real world problems, creating customer advantage. Working with our partners and customers, we collaborate widely, working in partnership, listening hard and thinking through what customers need. Building trusted partnerships, we are helping customers anticipate and shape future requirements, adding value and future advantage.
