

Photographic Services

The photographic facility, based at MOD Boscombe Down, offers a versatile range of photographic services to fit a broad spectrum of customer requirements. This highly skilled team of professionals has a vast experience of working both in hazardous and military environments. They have FTO (Flight Test Observer) status and hold medical clearances for all types of military aircraft, which enables them to fully support trials activities, both

on the ground and in the air. They can also provide photographic support to other activities, including trials or PR events external to Boscombe Down.

Amongst the services they offer are:

- Air to air photography – stills and video image capture using digital formats.
- Operation of fixed camera systems for airborne stores / weapon release, including high speed recording devices.
- Operation of ground based filming equipment for trials data recording or marketing purposes, both in the UK and Overseas.
- Operation of optical survey equipment to accurately determine the alignment of cameras on aircraft, and, to provide calibrated points for heading measurements.
- Stills image manipulation, photo layouts for presentation and large format printing.
- Cine and aerial wide film processing.
- Technical photography, both in the studio and onboard aircraft of installations, modifications etc

Macro photography reveals details which can not be seen with the naked eye – providing evidential material for investigations and safety cases

- Telecine transfers of processed film or archive material to video / digital formats.
- Video tape duplication to digital formats.
- Multi format video editing (including HD) for data compilation, documentary and marketing purposes

All imagery supplied will be in the format and resolution of the customers' choice.

Composite time lapse photography is just one of the special techniques that can be employed to turn data into knowledge

If you have a photographic requirement and you would like to discuss how we can help you, please contact
